Free AI Lip Sync Tool: Make videos talk - add realistic lip movements instantly

1 .Upload a Video

Upload a video with the face of a person whose lips you want to sync to your audio.

2 .Upload Your Audio

Upload audio with what you'd like the person in your video to say after applying lip sync. Or use one of our presets.

3 .Generate and Download

Click the "Sync Lips" button and your lip sync video will appear in a few minutes. Download it and share it anywhere!

Seamless Audio-Video Syncing

Our cutting-edge technology ensures perfect synchronization between your video visuals and any audio file, making it appear as if the video subjects are naturally speaking the new audio.

Global Reach, Local Feel

Break language barriers and expand your audience by localizing content with authentic lip-syncing, making your videos resonate with viewers worldwide in their native languages.

Effortless Content Repurposing

Quickly adapt existing videos for different contexts or audiences, from marketing campaigns to educational materials, without the need for costly re-shoots, extending the life and reach of your content.
